

DDN API DOCUMENTATION PROD

10th July 2026,

Version 1

1. Global Security & Authentication

All application programming interface (API) requests require standard token-based authorization. Access keys must be supplied within the request headers to be verified by the gateway layer.

Security Scheme	HTTP Header Key	Token Format
Bearer Token Authentication	Authorization	Bearer [Your_Access_Token]

2. Endpoint Specification: Find by SKU ID

HTTP Network Details

Method	Base Domain URL	Resource Path
POST	https://designnavigator.centuryply.com/	/api/findBySKUId/search

Request Headers Required

Header Field	Value / Implementation Example	Context & Operational Rules
Content-Type	application/json	Mandatory. Configures payload stream syntax processing.
Authorization	Bearer JYKcj98luq3W0FFtKBFpU1QHG kl8J6CEQkah2Y-BAEA	Mandatory. Unique encrypted signature mapping environment rights.

JSON Payload Parameters (Body)

Field Key	Type	Required	Field Description
SKUId	String	YES	The SkuID for lookup of items.

SKUsALLCode	Boolean	YES	If true returns similar design and all available finishes for that SKU
LaminateType	String	YES	Filter for Type of product. Values allowed “Laminates”, “Senzura”, “Sainik”, “Starline”, “Exteria”

4. Structural Status & Error Handling

HTTP Status	Internal Metric	Operational Meaning & Action Required
200 OK	Success	The core query parsed correctly. Target records found and returned.
400 Bad Request	Parsing Error	Syntax structural mismatch. Double-check types inside incoming JSON blocks.
401 Unauthorized	Invalid Token	The target bearer validation signature failed. Regenerate security token keys.
500 Server Error	System Fault	Internal exception processing database entities. File systemic tracking request.

5. Endpoint Specification: Find by Category (Paginated)

HTTP Network Details

Method	Base Domain URL	Resource Path
POST	https://designnavigator.centuryply.com/	/api/findByCategory/paginated

Request Headers Required

Header Field	Value / Implementation Example	Context & Operational Rules
Content-Type	application/json	Mandatory. Configures payload stream syntax processing.
Authorization	Bearer JYKcj98luq3W0FFtKBFpU1QHG kl8J6CEQkah2Y-BAEA	Mandatory. Unique encrypted signature mapping environment rights.

JSON Payload Parameters (Body)

Field Key	Type	Required	Field Description
category	String	YES	List of allowed values from category subcategory api
subcategory	Boolean	YES	List of allowed values from category subcategory api
itemType	String	YES	Filter for Type of product. Values allowed "Laminates", "Senzura", "Sainik", "Starline", "Exteria"

page	Number	NO	Page number based on number of records.
pageLimit	Number	NO	Number of records to be returned

6. Endpoint Specification: Daily Sync Incremental

HTTP Network Details

Method	Base Domain URL	Resource Path
POST	https://designnavigator.centuryply.com/	/api/laminates/incremental

Request Headers Required

Header Field	Value / Implementation Example	Context & Operational Rules
Content-Type	application/json	Mandatory. Configures payload stream syntax processing.
Authorization	Bearer JYKcj98luq3W0FFtKBFpU1QHG kl8J6CEQkah2Y-BAEA	Mandatory. Unique encrypted signature mapping environment rights.

JSON Payload Parameters (Body)

Field Key	Type	Required	Field Description
date	String	YES	Use Date Format YYYY-MM-DD or DD-MM-YYYY
page	Number	NO	Page number based on number of records.

pageLimit

Number

NO

Number of records to
be returned
